Programme Overview: 3rd China International Steel Tube & Pipe Conference

The steel pipe industry is currently navigating complex challenges, from volatile demand to stringent performance requirements in downstream sectors.

Experts will discuss how to respond to these developments at the **3rd China International Steel Tube & Pipe Conference on 22 September 2026**.
The event will take place at the **Shanghai Fuyue Hotel**.

Key Focus Areas of the Programme:

- **Market Dynamics:** In-depth analysis of the global tube and pipe market, investment climates, and regional trade opportunities.
- **Green Development:** Industry perspectives on the current transition towards sustainable practices in the steel sector.
- **Technical Excellence:** Presentations on extra-large diameter seamless rolling, high-temperature materials for power units, and machine vision in pickling lines.
- **Standards & Compliance:** Unveiling of new industry standards and guidance on overseas investment risk management.

This conference serves as a platform for dialogue among domestic and international stakeholders in the tube and pipe industry, aimed at fostering technical exchange and operational efficiency.
